

Leslie Cui

Email: lcui20829@gmail.com | Phone: +1 (647)553-9830

SKILLS

- Programming: Python, C#, SQL, MongoDB, Java, JavaScript, CSS, HTML.
- Web/Mobile Technologies: ReactJS, NodeJS, NextJS, MySQL, REST API, JSON.
- AI/Data: Numpy, Pandas, Pytorch.
- Google Cloud: Kubernetes Engine, Cloud Storage, Cloud SQL, VPC(Virtual Private Cloud), BigQuery, Dataflow, Pub/Sub, Logging, Monitoring and Pricing.

WORK EXPERIENCES

Full Stack Developer *Co-op* Jan. 2025 - Present
Centennial College Open Education Resources Development, Toronto

- Developed and implemented the backend architecture for the student site using **Next.js, Vercel and Tailwind CSS**, designing efficient APIs to facilitate seamless data exchange with the frontend.
- Implemented **RESTful APIs** to support dynamic content rendering and user interactions, optimizing response times and data retrieval efficiency.
- Utilized **HTML, CSS and Tailwind CSS** to create and implement tailored styles for diverse projects, enhancing the styling capabilities and efficiency of the project's frontend architecture and ensuring consistent design across all Open Educational Resources (OER).
- Developed high-quality digital content, including videos and interactive online activities, using authoring tools such as **H5P and Adobe Suite** to enhance the learning experience.
- Ensured all provided content and materials **complied with accessibility guidelines** by creating or reproducing transcripts, closed captions, and auxiliary images as needed to enhance accessibility.
- **Sourced and produced openly licensed images**, ensuring all media content was compatible with OER licensing requirements.

Full Stack Developer *Internship* Feb. 2024 - Aug. 2024
Vizon, Toronto

- Participated in designing the UI prototype of the AI study abroad system using **Figma**, which streamlined the development process and revised 3 versions of UI.
- Developed frontend pages as the main developer with **React.js** and **Material UI library**, resulting in a 25% increase in user engagement due to enhanced responsiveness.
- Collaborated and worked with the backend team to integrate more than 5 APIs using **Node.js**, leading to faster and more reliable system performance.
- Designed and implemented data scraping and data cleaning processes using **Python, Numpy and Pandas**, reducing data inconsistencies by around 30% and ensuring high quality data for the AI system.
- Contributed to the design of a relational database, supporting scalable data storage for future system expansion to **NoSQL database**.

PROJECTS

BeatSnap | React.js (Frontend), Node.js (Backend), PostgreSQL (Database) Oct. 2024 - Dec. 2024

- Developed and implemented responsive user interfaces using **React.js**, demonstrating advanced proficiency in **HTML and CSS** to create an intuitive and engaging user experience.
- Collaborated on backend deployment and orchestrated database integrations with **PostgreSQL**, ensuring seamless data connectivity and a robust system architecture.
- Contributed to full-stack development, including **front-end coding, backend support, and database connectivity**, fostering a cohesive and high-performing project environment.
- **Achieved Second Place out of 12 teams** in a semester-long group project, demonstrating strong teamwork, collaboration, and problem-solving skills.

EDUCATION BACKGROUND

Georgia Institute of Technology	<i>Master of Science, Computer Science</i>	Jan. 2025 – Present
Centennial College	<i>Software Engineering Technology with Coop</i>	Jan. 2024 - April 2025
Peking University	<i>Bachelor of Law</i>	Aug. 2018 - July. 2023
